

Introducing:

*The Future of
Inventory Management
Is Here*

**Need to Know Bin Levels When You Are Off Site?
Want to Receive an Email or Text When Bins Get to a Certain Level?
Does Purchasing or Management Need to Know Inventory Data?**

Your Company Needs *BinView®*

BinView® is the web-based monitoring solution for bins, tanks, and silos that enables remote wireless inventory management of material levels in multiple bins from any computer with access to the Internet.

Web-Based Bin Monitoring Remote Wireless Inventory Management

- **Real-Time Control** – Data streams instantaneously from BinMaster sensors to the Internet providing accurate, reliable bin information.
- **Data Security** – End-to-end encryption and authentication ensure data is safe and confidential from the bin to the corporate office.
- **Automated Alerts**– Immediately sends email and cell phone alerts when bin conditions meet user-defined thresholds.
- **Wireless Integration** –*BinView®* simplifies and reduces installation costs with a wireless solution optimized for Bin monitoring.
- **Highly Scalable** – *BinView®* can monitor one or a hundred bins and grow as operations expand.
- **Streamlines Operations** – There is no need to manually check bin levels which saves time, and improves the efficiency of ordering and logistics.

BinView® is ideal for operations of all sizes from a single site with just a few bins or a multiple site operation with hundreds of bins.

BinView® can be applied to any industry that needs to monitor its tanks remotely on an ongoing basis ... from a poultry farm that needs to be sure adequate feed is on hand to a multi-site concrete batch plant operation that relies on a fleet of trucks deployed to replenish material.

BinView® can be used with the BinMaster:

- **Smart Bob2** for bins up to 180' tall
- **SmartBob-TS1** for bins up to 40' tall.

BinView® measurements can be taken at pre-determined time intervals or on demand and can be displayed on any computer that has a connection to the Internet.

BinView® data is available only to authorized users and is secured to ensure data is confidential from the bin to the corporation office.

What Do You Get With BinView®?

- 24/7, real-time control as data streams instantaneously from BinMaster sensors to the Internet for accurate, up-to-date bin information.
- BinView® can send automated alerts to a computer, PDA or cell phone when bin conditions meet user-defined thresholds.
- Site mapping capabilities include a built-in visual mapping feature that shows tank types, locations and levels to streamline operations and optimize delivery schedules.
- Advanced reporting includes historical records that can help companies control inventory levels, make better purchasing decisions, track usage trends and keep people informed at every level of the organization.
- BinView® is tailor-made with options like wireless communications devices to simplify and reduce installation costs and 900 MHz or Zigbee modules that can be easily integrated into a customer's existing system.
